

# Conservation Nation

**Week 2**  
**June 13-16, 2011**

Explore the many challenges ahead of all those who live on the earth. Research, write, draw and talk about a few of the following urgent challenges and prepare to present your findings on how to:

- Clean the air
- Save the trees
- Keep our natural lakes clean
- Protect endangered animals
- Conserve natural resources
- Reduce emission
- Recycle waste and water
- Utilize geothermal and solar energy

Use your creativity to design a bumper sticker or poster, write a poem or a letter to the President of the United States about your best idea or invention to Save the Planet.

## Reduce, Reuse, & Recycle!

**Middle School Emphasis:**  
**Urban forestry, photosynthesis and ecosystems**
